

Pinnacle Pro Laser System

60 Watt

ASPEN LASER

Laser Therapy has been successfully used to treat a broad range of medical conditions, including musculoskeletal problems, arthritis, sports injuries, post-surgical wounds, diabetic ulcers and dermatological conditions. It is best known for its ability to dramatically reduce inflammation, resulting in accelerated healing as well as chronic and acute pain relief.

Unlike many pharmacological treatments that mask pain or only address the symptoms of disease, Laser Therapy treats the underlying condition or pathology to promote healing.

Treatments are fast, effective, and the benefits are long lasting.

How it works: When the light source is placed against the skin, the photons penetrate and are absorbed by the mitochondria (the energy producing part of a cell). This energy fuels many positive physiological responses resulting in the restoration of normal cell morphology and function.

Included in Your Pinnacle Pro Series Laser System:

- > Laser Console
- > Large Touch-screen
- > Wheeled chassis
- > Ergonomic Laser Hand Piece
- > 200 Patient Brochures
- > Power Cord
- > Warning Sign
- > Safety Goggles (2 pair)
- > Operating Manual
- > Marketing Resource CD

Pinnacle Pro Laser Systems Product Features

– Innovations That Matter –

PROVEN CLINICAL BENEFITS OF LASER – TOP 10

1. Anti-Inflammation:

Laser therapy has an anti-edemic effect as it causes vasodilation, but also because it activates the lymphatic drainage system (drains swollen areas). As a result, there is a reduction in swelling caused by bruising or inflammation.

2. Anti-Pain (Analgesic):

Laser therapy has a high beneficial effect on nerve cells which block pain transmitted by these cells to the brain and which decreases nerve sensitivity. Also, due to less inflammation, there is less edema and less pain.

3. Accelerated Tissue Repair and Cell Growth:

Photons of light from lasers penetrate deeply into tissue and accelerate cellular reproduction and growth. The laser light increases the energy available to the cell so that the cell can take on nutrients faster and get rid of waste products.

4. Improved Vascular Activity:

Laser light will significantly increase the formation of new capillaries in damaged tissue that speeds up the healing process, closes wounds quickly and reduces scar tissue.

5. Increased Metabolic Activity:

Laser therapy creates higher outputs of specific enzymes, greater oxygen and food particle loads for blood cells.

6. Trigger Points and Acupuncture Points:

Laser therapy stimulates muscle trigger points and acupuncture points on a non-invasive basis providing musculoskeletal pain relief.

7. Reduced Fibrous Tissue Formation:

Laser Therapy reduces the formation of scar tissue following tissue damage from cuts, scratches, burns or surgery.

8. Improved Nerve Function:

Slow recovery of nerve functions in damaged tissue can result in numbness and impaired limbs. Laser light will speed up the process of axonal regeneration, nerve cell reconnection, and increase the amplitude of action potentials to optimize muscle action.

9. Immunoregulation:

Laser light has a direct effect on immunity status by stimulation of immunoglobulins and lymphocytes. Laser Therapy is absorbed by chromophores (molecule enzymes) that react to laser light. The enzyme flavomono-nucleotide is activated and starts the production of ATP (adenosine-triphosphate), which is the major carrier of cell energy and the energy source for all chemical reactions in the cells.

10. Faster Wound Healing:

Laser light stimulates fibroblast development (fibroblasts are the building blocks of collagen, which is predominant in wound healing) in damaged tissue. Collagen is the essential protein required to replace old tissue or to repair tissue injuries.

Laser Type	GaAIAs Diode Laser
Model	Pinnacle Pro 60 Watt
Wavelength, Laser	980nm, 810nm, 980nm+810nm
Maximum Power	60 watts
Operation Modes	Continuous Wave (CW) and Pulse
Pulse Duration	10µs-3s
Repetition Rate	0.2Hz-20KHz
Fiber Sizes	550µM (Therapy)
Pilot (Aiming) Beam	Red Diode Laser of 635nm, Power <5mW
Control Mode	True Color Touch Screen
Voltage/Current Rating	110/220 VAC, 5A , 50/60 Hz
Safety Compliance	CE0197
Dimensions	470(W) x 420(L) x 1150(H) mm
Weight	73 lbs.

*Specifications subject to change without notice
